

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The Louisiana Water-Thrush Breeding in Berkshire County, Mass.—On the eleventh of June, 1896, I found a pair of Louisiana Water-Thrushes (*Seiurus motacilla*) feeding fledged young, near a clear mountain brook in Sheffield, Berkshire Co., Mass.—WALTER FAXON, *Museum of Comparative Zoölogy, Cambridge, Mass.*

The Mockingbird (*Mimus polyglottos*) in Canada.—A young Mockingbird taken in the fall of 1894 and sent to me from Sable Island, Nova Scotia, constitutes the fifth record of this species for Canada. The other four are so scattered and have been so often incompletely quoted it seems worth while to review them here. They stand as follows:

I. Strathroy, Ont. (Strathroy Age [newspaper], July 1, 1880; Forest and Stream, XV, Aug. 26, 1880, p. 67; Bull. N. O. C., VI, 1881, p. 112). A single bird was seen in the town but not captured.

II. Chatham, Ont. (Morden and Saunders, Canadian Sportsman and Naturalist, II, Nov. 1882, p. 184; Chamberlain, Cat. Canadian Birds, 1887, p. 110; McIlwraith, Birds of Ontario, revised ed., 1894, p. 388; Piers, Trans. N. S. Inst. Nat. Sci., I, ser. 2, pt. iv, 1895, p. 409).

In point of time, 1860, this is the first Mockingbird taken in Canada. Mr. Edwin W. Sandys, who originally furnished the record, was recently seen by the writer, and he tells me the bird was secured by his father and is now in a collection of stuffed birds made by him. It was seen perched on the ridge pole of a barn one June morning just after a warm southerly gale, and its rich song was what first drew attention to it.

III. Hamilton, Ont. (McIlwraith, Birds of Ontario, 1886, p. 284, revised ed., 1894, p. 388; Chamberlain, Cat. Canadian Birds, 1887, p. 110; Piers, Trans. N. S. Inst. Sci., I, ser. 2, pt. iv, 1895, p. 409). A pair of birds spent the summer of 1883 at East Hamilton.

IV. Truro, N. S. (McLennan, Orn. and Oö1., XIV, Aug. 1889, p. 126; Piers, Trans. N. S. Inst. Nat. Sci., I, ser. 2, pt. iv, pp. 408-410). A bird was wounded and caught alive July 1, 1889. It showed no signs of being an escaped cage bird. Then it was put in a cage, where it lived for three years when it died and was thrown away.

V. Sable Island, N. S. This is a young bird in much worn first plumage, taken in the fall of 1894. I have been unable to obtain any information about the specimen except that it did not come to the island in a cage, and we can only assume it was carried thither by some resistless storm, perhaps from the mainland or more likely from some far more southern home.—JONATHAN DWIGHT, JR., *New York City.*

Thriothorus or Thryothorus?—I am interested in Mr. William Palmer's 'Thoughts on the New Check-List,' which suggests some thoughts in me. One of these thoughts is, that Mr. Palmer's criticisms are perfectly candid and sincere, and, therefore, should not be taken *de haut en bas*, but welcomed for anything they offer for the bettering of the Committee's performance. Another thought suggested is, that sometimes
